Excellent Yield Stability for the Dryland Acre

- Maximizes yield when it rains; increases yield potential when it doesn't
- Population flexibility across all environments
- Superior heat and drought tolerance

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Ratings are based on interpretation of statistically analyzed results of studies conducted by Syngenta and may change as additional data are gathered.
