### -Feeding Directions-

Feed free-choice to free ranging deer and game animals. Intake will normally be 1% of body weight. Intake may be adjusted by locating feeders nearer to or farther from water, forage or cover areas. This ration can be fed to animals in small enclosures. In total confinement situations, feed intake should be 2% to 3% of body weight, depending on the source of roughage. Supplemental roughage (such as alfalfa hay) should be available at all times. Provide a source of fresh, clean water at all times. Do Not Feed wet, moldy or insect infested feed.
