ST 4993B3XF Variety

Engenia[®]Liberty[®]

Herbicide Herbicide

Growers across the Cotton Belt who want hardy, early-season vigor and good storm tolerance can plant Stoneville[®] 4993B3XF with confidence. This early- to mid-maturity Stoneville cotton seed variety is very adaptable, with strong emergence and good cotton fiber quality. This easy-to-manage variety also delivers resistance to bacterial blight in cotton and consistency in high yield potential.

Advantages

- Selected and tested specifically for top agronomic performance with higher yield potential, good storm tolerance* and high gin turnout
- Native trait protection including rootknot nematode resistance, *Fusarium* wilt tolerance, bacterial blight resistance and *Verticillium* wilt tolerance
- Season-long protection with three proteins to help protect your cotton plants against bollworm and other cotton pests

Geographic Region:

- Widely adapted across the Cotton Belt

Variety Characteristics

Leaf Pubescence	SEMI-SMOOTH
Maturity**	EARLY-MID
Height/Growth Habit	MEDIUM/MODERATE
Storm Tolerance*	6.8

Disease Resistance

Root-Knot Nematode/ <i>Fusarium</i> Wilt Resistance	FAIR
<i>Verticillium</i> Wilt Tolerance	FAIR
Bacterial Blight Resistance	RESISTANT

Fiber Quality

Length	1.14
Uniformity	83.3
Strength	31.7
Micronaire	4.52

*Storm Tolerance Rating Scale: 9 very storm-tolerant; 0 very loose.

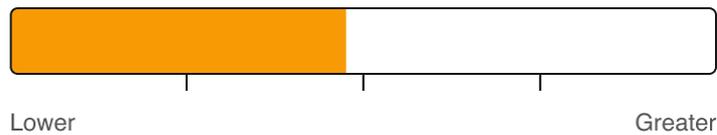

**Relative maturity can vary based on on management practices, environmental conditions and geographic regions. Descriptions and values reported are to give a relative comparison among varieties. Actual values will be influenced by growing conditions.
