### USE AND MIXING DIRECTIONS

**STORAGE AND DISPOSAL:** Do not contaminate water or food by storage or disposal.

**STORAGE:** Store in a cool, dry place. Do not contaminate with pesticides or fertilizer.

**PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**CONTAINER DISPOSAL:** Completely empty bag into application equipment. Then dispose of empty bag in a sanitary landfill or by incineration, or, if allowed by State and local authorities, by burning. If burned, stay out of smoke.

### FEEDING DIRECTIONS

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

This product only prevents the development of house flies, stable flies, face flies, horn flies and manure breeding flies in the manure of treated swine, but is not effective against existing adult flies. Begin use early in the spring, 30 days before flies begin to appear, and continue feeding throughout the summer and into the fall until cold weather restricts fly activity. In some cases, supplemental fly control measure may be needed in and around pastures, barns, and feedlots to control adult house and stable flies which can breed in other decaying, organic matter or slage in the area, or that migrate in from other locations.

ShowTec 14.5/6 BMD medicated is a complete feed specifically formulated for pigs fed for exhibition weighing from 150 lbs to market weight. Transition pigs to the appropriate ShowTec product for the weight of the pigs being fed. Feed at the rate of 5.0 lbs per head per day to animals weighing 250 lbs to provide 0.2 mg diflubenzuron per kg of body weight per day. The higher inclusion rate for diflubenzuron (0.2 to 0.3 mg/kg allowed) is to be used for lighter weight pigs. Provide clean, fresh water at all times.

**NOTICE:** Do not use in any finished feed (supplement, concentrate or complete feed) containing in excess of 2% bentonite. 05124
