

JSS 100

MEDIUM-EARLY SORGHUM SUDANGRASS

-  Consistent performance with excellent leaf growth.
-  Semi-sweet stalk with good leaf-to-stem ratio.
-  Very good leaf disease resistance make this best suited for humid climates.
-  Ideal for multi-cutting hay production or grazing.
-  Harvest in the boot stage to maximize digestibility.
-  Maintains thin stalks even under lighter planting.
-  High level of SCA tolerance.

CHARACTERISTICS & AGRONOMICS

RELATIVE MATURITY: **Med - Early**

SEEDS/ lb (1,000): **18 - 20**

GRAIN COLOR: **White**

DAYS TO BOOT: **60**

DAYS TO SOFT DOUGH: **40" - 46"**

USAGE: **Hay / Grazing**

Plant Height (ft) **6-7**

Lodging Resistance **8**

Nutritional Value **7**

Regrowth **8**

Drought Tolerance **9**

Sugar Cane Aphid Tolerance **9**
