

# JFS 4000

## MEDIUM-FULL FORAGE SORGHUM

 Good tolerance to sugarcane aphids.

 Juicy semi-sweet stalk with high leaf-to-stalk ratio with high grain yields possible.

 Shorter plant height for excellent lodging resistance, great choice for silage production

 High yielding forage sorghum under favorable conditions.

 Harvest at soft dough for highest quality silage.

 Plant where Sugar Cane Aphid Pressure is likely.

## CHARACTERISTICS & AGRONOMICS

RELATIVE MATURITY: **Med - Full**

SEEDS/ lb (1,000): **15 - 16**

GRAIN COLOR: **Red**

DAYS TO BOOT: **75 - 85**

DAYS TO SOFT DOUGH: **105 - 110**

USAGE: **Silage**

Plant Height (ft) 6-8

Lodging Resistance 8

Nutritional Value 9

Regrowth 3

Drought Tolerance 7

Sugar Cane Aphid Tolerance 8
