

SULFONYLUREA (SU)
Tolerance

CONVENTIONAL OIL

SVS 421EC

SVS 421EC is designed for the Express® production system. This hybrid delivers the highest yield potential in its maturity group. Excellent disease and drought tolerance create exceptionally consistent yields across all soil types.

Agronomic Traits

- SU herbicide tolerance
- DMR tolerance
- OR7 tolerance
- Consistent across soil types
- Exceptional disease tolerance
- Drought tolerance
- Very good center head fill
- Semi turned head position

Characteristics

Maturity.....Medium
 Seed colorBlack
 Sunflower typeOil
 Oil typeLinoleic
 Average oil content46-48
 Days to flower59
 Days to relative maturity96
 Average height59-65 inches

Agronomic Rating	1	3	5	7	9
Leaf Rust					
Phomopsis					
Downey Mildew					
Stalk Quality					
Root Quality					
Self-Compatibility					

Scale 1 to 9: 9=Highly Resistant, 1=Highly Susceptible
