

MFM MEAT PEN GROWER MIX

By mixing the MFM 15% Rabbit Pellets and the MFM 18% Breeder & Show Rabbit Pellets in a 50/50 mix, the result is a perfect product for growing a champion meat pen or single fryer rabbit. Combine equal amounts of each MFM Rabbit feed and the resulting mix will yield the following nutritional specs:

Meat Pen Grower Mix

16.5%
PROTEIN

3.25%
FAT

19.5%
FIBER

4,250 IU/#
VITAMIN A

The resulting 16.5% protein and 3.25% fat level allows the meat pen rabbits to grow consistently and develop the hard muscling which meat pen judges prefer.

Feed your young rabbits this mixture from day one until show day. Feed free choice and weigh weekly to determine a projected weight at show day.

MFM has fed numerous county Grand Champion and Reserve Champion meat pens as well as top 10 and top 30 placings at the Houston Livestock Show Youth Meat Pen Competition with this mix.

MFM offers two quality rabbit feeds that have produced many show winners over the past years in both breeding shows as well as meat pen competitions. The MFM 18% Breeder and Show Rabbit Pellets stands the test of time as an outstanding feed for the discerning rabbit breeder.

Both feeds also contain Yucca Schidigera plant extract for odor prevention, yeast culture for gut health, chelated trace minerals for better digestibility and absorption, and flaxseed meal for improved hair shine.
